

NEWS

New range of tables and welded sinks

Our tables and welded sinks are now a structurally different product from the dismantled ones. The new entirely welded structure design offers an exceptional robustness and stability.

This state-of-the-art structure is manufactured with strongly joined tubes by means of MIG welded seams and has additional reinforcement on the countertop area as well as the lower part of the structure itself.

Industrial extractor hoods

We offer new ranges of extractor hoods, which add up to a total of 126 models, including straight central normal or compensated extractor hoods, induction extractor hoods for show cooking and vapour extractors.

Following the same process of other ranges, they are sealed welded devices of up to 6 metres and available for their immediate delivery.

NEWS

Cocktail stations

They are robust, premium stations perfectly equipped, which have been designed with the cooperation of professional barmen and comprise all the necessary characteristics to facilitate the barman's work and increase the business productivity.

They are available for delivery within 24 to 72 hours, depending on the model.

The models equipped with refrigerating drawers are extremely compact, functional working stations that reduce the space necessity in the premises as well as the overall purchase cost due to the fact that they do not require additional cooled tables.

Table MCBN-100. Basic compact and economic model for combined furniture and basic cocktail furniture.

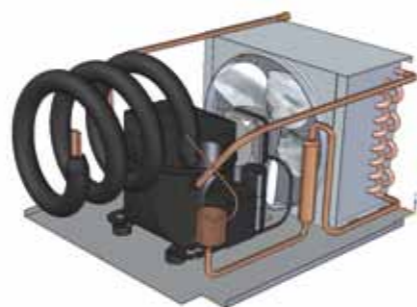

NEWS

Ecological coolant gas R290

As an important innovation, all ERATOS refrigerating equipment are now supplied with ecological refrigerating gas R290 (propane).

Thus, in ERATOS the future is already the present. Our firm intent for a sustainable growth, R&D and continuous investment on latest-generation industrial equipment, place us in a leading edge position, always at the forefront of networking technology.

The use of gas R290 in our refrigerating products generates important economic and environmental advantages

- ERATOS products with gas R290 have a price (RRP) 2% inferior to the ones with equivalent coolant gasses.
- Gas R290 is very efficient, allowing savings of 10% to 30% in electrical consumption depending on the model, seriously reducing the working cost of the product during its life span.
- The price of the gas R290 is lower compared to the more frequent fluorinated gasses (HFC), which makes it possible to reduce manufacturing costs during all the equipment life span.
- Unlike fluorinated gasses (HFC), R290 is an environmentally-friendly hydrocarbon, innocuous for the ozone layer and with a practically null GWP rate (global warming potential).

Coolant	R404A	R452A	R134a	R290
Global warming potential (GWP)	3922	2140	1540	3
Coolant	PCA ≥ 2500		PCA ≥ 150	
Forbidden from	1 January 2020		1 January 2022	

Children self-service

Innovative Children Self-service specifically designed for the catering to children of different ages, normally between 6 and 12 years old.

It is a personalized modular range which has been carefully designed to ensure children's security as well as use ergonomics.

NEWS

New drop-in models and lamp strips

ERATOS 2019 Drop-in range constitutes an utterly complete catalogue of embedding elements and lamp strips for Buffet. They are reliable products, finely finished and of easy installation.

Among our models you can find two-level cooled boards, white tempered glass hot plates, glass-ceramic hot plates for show cooking, straight refrigerated showcases and tilted lamp strips.

Modular show-cooking

The new modular show-cooking units are manufactured of premium quality material and perfectly customized aesthetically as well as functionally.

They can be supplied as independent modules or settled in lineal modules combined with ERATOS Buffet modules.

They are delivered fully mounted and have wheels, which enables an easy, ergonomic, economical, immediate installation.

Permanent investment and excellence at the service of our clients

ERATOS is composed of a team compromised with its excellence in all areas of our company. We are professionals who work with competence, responsibility and great enthusiasm to offer the best products and outstanding service to our clients.

Our new factory features leading-edge technology in management as well as in production systems. We seriously commit to sustainability and continue developing towards the digitalization of our industrial processes and a more personalized and effective relation with our clients.

We work purposefully to give our clients a close, personal approach, meeting their needs and offering the best price and personal care.

More than 90% of our available products are delivered within 24 hours and shipped by a transport company directly from the factory to the address given by the client.

Excellent products with certified quality perfectly designed and manufactured for an intensive professional use to comply with an ergonomic long-lasting function.

We invest in latest technology machinery and equipment which brings down the manufacturing process period, increases the quality of our products and considerably reduces the environmental impact in the manufacturing process.

We test prototypes in our laboratories to steadily improve our products.

Our technical department use engineering advanced programmes for the calculation, simulation and design of our products.

ERATOS is a company compromised with the people and with social, economic and environmental improvement even beyond what is legally required. We develop, sponsor and invest in numerous sustainability actions, training programmes, social aid, et

Maximum quality
Products manufactured of highest quality stainless steel AISI 304 18/10, designed with functional, elegant and uniform lines. Perfect, solid, hygienic finishes.

Sinks
Entirely welded countertops with backplash, front profile and sinks provided with rounded sanitary edges. Sound-proof embedded drainers.

Dismounted models
Our dismantled models have been designed for a quick and easy assemble of the countertop, legs and shelves, and present a robust structure. They are supplied with screws and all necessary accessories.

Welded models
Countertop and frame with or without shelf, utterly welded together to obtain a solid, stable and robust structure. Recessed back legs, height adjustable by means of un-seen screws.

Taps
Vast range of taps designed for professional use and manufactured of high quality materials that ensure their ergonomics and durability.

Uniform design
The uniform design of sinks, tables and all other products of our catalogue enables the combination of elements with total aesthetic and functional harmony, achieving elegant and practical compositions.

Wide range and availability
Our wide range of sinks, tables for dishwashers and taps provides a solution adaptable to each situation. Our permanent stock ensures immediate delivery dates.

Accessories
Our vast offer of accessories, including basins, closed cases, shelves or waste buckets enables the setting of more personalized equipment.

DISMOUNTED MODELS

DISMOUNTED SINKS 550-600-700

- These models are supplied dismantled.
- The different elements shape a very solid structure, easy and quick to assemble by means of Allen screws (Allen key included).

SINKS:

- Manufactured of satin stainless steel AISI-304 18/10.
- 100 mm backsplash and 50mm rounded fronts, entirely welded.
- Stainless steel AISI -304 18/10 embedded wells with soundproof cover, drainage valve and spillway tube.
- They can be equipped with a vast range of taps, see pages 31-35
- Optionally, all models can be supplied with a bore for tap fitting, see page 26, RRP 28 €.

WELDED MODELS

WELDED SINKS RANGE 550-600-700

- This range of models is supplied utterly welded.
- The new design and quality of its materials give them a maximum robustness and stability.
- 3 manufacturing possibilities:
 1. Models with frame support.
 2. Models with frame support + shelf.
 3. Completely closed cases with doors.
- Sink manufactured of stainless steel AISI-304 18/10 with 100 mm backsplash and 50mm rounded fronts, entirely welded.
- Embedded wells with soundproof cover, drainage valve and spillway tube.
- Recessed back legs, 50mm, to protect sanitary profiles on the floor.

- Legs manufactured of 40x40mm tubes with adjustable end by means of sanitary unseen screw. Height adjustable between 85 and 90 cm.
- Shelves manufactured of satin stainless steel AISI-304 18/10, with omegas reinforcement on galvanized steel.
- They can be equipped with a vast range of taps, see pages 31-35.
- Optionally, all models can be supplied with a bore for tap fitting, see page 26, RRP 28 €.

SINK CASE WITH DOORS

- This range of models is supplied utterly mounted and welded to the sink and the base shelf.
- Open back to allow easy access to fittings.
- Robust height adjustable legs by means of sanitary unseen screw.
- Height adjustable between 85 and 90 cm.
- Smooth-slide suspended sliding doors by means of rail with ball bearing, except for model FMM-66 /10 with hinged door.
- Option: key lock on doors. Ref. OCPC: 88 €.

SHELVES:

There are models with lower shelf welded to the 4 legs, which enlarges its life span and gives it more robustness.

SINK CASE:

- It is supplied mounted and welded to the sink.
- Without backrest to allow easy access to fittings.
- Robust height adjustable legs by means of sanitary unseen screw. Adjustable height between 85 and 90 cm.
- Smooth-slide suspended sliding doors by means of rail with ball bearing.
- Optional: key lock on doors. Ref. OCPC: 88 €.

WELDED MODELS

WELDED SINKS WITH DISHWASHER SHAFT RANGE 550-600-700

These models are supplied utterly welded.

SINKS WITH FRAME SUPPORT:

- Manufactured of stainless steel AISI-304 18/10.
- 100 mm backsplash and 50mm rounded fronts, entirely welded.
- Stainless steel AISI -304 18/10 embedded wells with sound-proof cover, drainage valve and spillway tube.
- Frame support manufactured of satin stainless steel 304 18/10 with galvanized steel backrest. Legs manufactured of 40x40mm tubes with adjustable end by means of sanitary unseen screw. Height adjustable between 85 and 90 cm. Recessed back legs, 50mm, to protect sanitary profiles on the floor.

DISHWASHER SINK CASE WITH DOORS:

- It is supplied mounted and welded to the sink.
- Without backrest to allow easy access to fittings.
- Robust height adjustable legs by means of sanitary unseen screw. Adjustable height between 85 and 90 cm.
- Hinged doors with the possibility of key lock. Ref. OCPB: 35 €.
- Models FMLM-186 and FMLM-187: Suspended sliding doors by means of rail with ball bearing. Optionally, key lock OCPC: 88 €

SHELVES:

There are models with lower shelf welded to the 4 legs, which enlarges its life span and gives it more robustness.

Designed to accommodate a glasswasher.

Designed to accommodate a dishwasher, maximum: 600x600x850mm.

Maximum quality
Products manufactured of highest quality stainless steel AISI 304 18/10, designed with functional, elegant and uniform lines. Perfect, solid, hygienic finishes.

Countertops
They are very solid and completely welded tables with back-splash and sanitary rounded front edges. Soundproof countertops reinforced by highly thick omegas.

Dismounted models
Our dismantled models have been designed for a quick and easy assemble of the countertop, legs and shelves, and present a robust structure. They are supplied with screws and all necessary accessories.

Welded models
Countertops, legs and shelves utterly welded together to obtain a solid, stable and robust structure. Recessed 100mm back legs, height adjustable by means of unseen screws.

Uniform design
The uniform design of sinks, tables and all other products of our catalogue enables the combination of elements with total aesthetic and functional harmony, achieving elegant and practical compositions.

Wide range and availability
Our wide range of tables, together with the possibility of customized manufacturing, provides our clients with a solution adapted to each personal requirement. Our permanent stock ensures immediate delivery dates.

Options
Drawers, chests of drawers, slides modules, tabletop shelves, lam strips and heat lamp strips are all accessories that increase the tabletops functional possibilities.

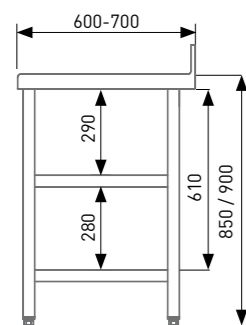

Cocktail Stations
To our previous offer of cocktail stations, a vast range of new cocktail stations has been included.

Maximum quality
Products manufactured in AISI 304 18/10 Stainless Steel. Designed for a lasting professional use, with functional lines and robust, solid, hygienic finish.

Ergonomics and productivity
Professional, ergonomic, compact and very well equipped tables. Designed to organize and facilitate the barman development thus enhancing her/his productivity and the business profit.

Refrigerated models
The refrigerated models are very compact and functional cocktail stations. They contain cold storage with ample totally removable drawers with telescopic guide rails.

Insulated well
Big well insulated with high density and thickness injected polyurethane, welded, watertight and with drainage. It contains double drilled bottom, mobile divisions and wells

Professional functionality
Sink with tap, double drilled bottom and countertop glass rinser, removable cutting top with waste container, polypropylene bar cocktail stoppers, blender support, speed track, etc.

Broad range
There is a station for each possible necessity. Basic models, for combined cocktails, professional cocktail tables, refrigerated cocktail stations, mobile cocktail stations with counter and decorated panel, etc.

Options and accessories
Depending on the model, options and accessories such as a second speed track, GN buckets for ingredients, various types of taps, wheels, upper counter and decorated panel can be added.

Availability
All tables and cocktail stations in ERATOS catalogue as well as their options, are available for shipping in a reduced delivery time from 24 to 74 hours, depending on the model.

COMBINED COCKTAIL PREPARATION TABLE

NEW

- Satin 304 18/10 stainless steel table.
- 40x40 mm stainless steel tube structure welded to the countertop.
- Model manufactured with lower shelf and back reinforcement.
- Stainless steel, height adjustable legs by means of hidden screw.
- Countertop with 40mm high backsplash.
- 520x200 mm countertop surface.
- Thermally insulated well with ecologic injected polyurethane 725x405x300mm and incorporated drainage.

- It contains drilled bottom in the entire well, as well as 2 mobile divisions.
- Insulated well capacity: 2 areas for ice, 1 area for bottles, 1 area for 7 GN 1/9-100 wells (wells not included in the price, see optional kit KCB -120)
- 900x110mm front speed track with capacity for 10/11 bottles, easily removable. Optionally, a second track can be included; model CRB-100 can be added.
- It contains a beating board for polyethylene cocktail lid, removable for its thorough cleaning.

Maximum quality

Products manufactured of stainless steel AISI 304 18/10, with functional, elegant and uniform lines designs with perfect, solid, hygienic finishes.

Robustness

All furniture has been carefully designed and reinforced to provide the reliability needed for a professional use. Including neutral furniture is solid, stable and long-lasting.

Modularity

We offer a high standard modular design system which enables monoblock sets adapted to any quick, easy and economical necessity.

Countertop

They can be customised and are supplied utterly welded with backsplash and sanitary rounded fronts. Reinforced and soundproof with high thickness omegas.

Heated tables

Manufactured of high quality components. They offer a maximum energetic efficiency thanks to their integral insulation by means of double wall and fibreglass in furniture as well as in doors.

Uniform design

The countertops, tables and neutral furniture can be combined with tables, sinks and other products from our catalogue thanks to their uniform aesthetic design.

Practical details

Drawers and serving units are manufactured with soft closing system and full extension telescopic slides. They integrate suspended sliding doors with unseen upper slide. Tilted furniture tops.

Complements

Our vast offer of complementary products including wall shelves, extractor hoods, tables or sinks enables the most personal solution to any possible necessity.

CLOSED NEUTRAL FURNITURE WITH SLIDING DOORS

- Countertops manufactured of satin stainless steel AISI-304 18/10.
- Countertops with 100 mm backsplash (on wall models) and 50mm rounded fronts, entirely welded.
- Countertops and shelves with omegas reinforcement.
- Intermediate shelf adjustable in height by means of highly resistant support.
- Suspended sliding doors of smooth slide by means of rail with ball bearing.
- Robust legs, height adjustable by unseen screws.
- Modular furniture easily integrated to any other modular neutral elements by means of common or independent countertop.
- Possibility of integrating a key lock, model OCPC: 88 €.

BEIN MARIE WARMERS

- Countertops manufactured of satin stainless steel AISI-304 18/10.
- Countertops with 50mm rounded fronts, entirely welded.
- Embedded well with sanitary rounded corners for wells GN of up to 150mm deep (humid models) or 200mm (dry models). Trays not included.
- Adjustable well temperature +50°C/+90°C.
- Insulation by means of fireproof ecological polyurethane.
- Suspended sliding doors of smooth slide by means of rail with ball bearing.
- Robust legs, height adjustable by unseen screws.
- Control panel with illuminated switch and adjustable digital

- thermometer/thermostat and security thermal protection.
- Single-phase 230V/50 Hz (except for modules MBMN-225 and MBMR-225: three-phase 400V/50Hz).

Models with heated reserve:

- Interior heating by means of easily removable ventilated resistances.
- Maximum energetic efficiency thanks to the double wall and fibreglass integral insulation, in the case as well as the doors.
- Control panel with illuminated switch and adjustable digital thermometer/thermostat with security thermal protection.

HUMID BEIN MARIE WARMERS

- Well heating by means of silicone resistances that improve and reduce the electric consumption.
- Inlet taps and integrated drainage 1/2", with ball valve mechanism and removable spillway tube.

STAINLESS STEEL AND POLYPROPYLENE SHELVING UNITS

- Stainless steel and polypropylene shelving units with excellent quality-price ratio, designed for perfect adaptation to all refrigeration, catering and food industry thanks to their performance and constructive characteristics.
- Anodized aluminium structure and polypropylene grilles.
- Adjustable in height every 150mm.

Quality and hygiene

Robust, hygienic and long-lasting shelving units, with rack ladders structure and crossbars manufactured of anodized aluminium and removable high-density polypropylene grilles.

Easy to assemble

Shelving units designed with a quick, easy and intuitive assembly system, which does not require qualified staff, screws or tools. Once assembled, it acquires a solid, resistant performance.

Modularity

Modular shelving units without lineal-angle setting limits and with up to 10 levels of shelves. Adjustable height feet by means of unsewn screw and optional wheels.

Performance

Our shelving units can be in direct contact with food. They support temperatures of -30° to +75°C and distributed loads of 100 kg/m or punctual loads of 120 kg/shelf.

COMPLETE SHELVES

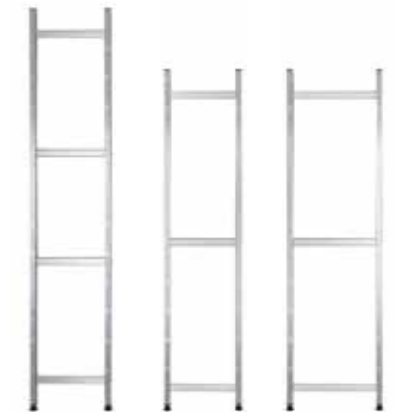

- They include crossbars, grilles and anchor.

The **Snack Series** is a practical, compact and solid range of extractor canopies designed to be integrated to small and medium sized kitchens. It offers a perfect balance between quality, functionality and price.

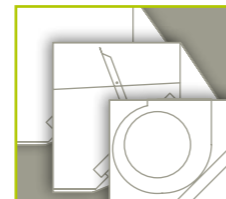

The **Industrial and Inverted-filter** extractor canopies are high performance, big, robust models designed to be installed in kitchens needing a large smoke extraction capacity.

Maximum quality
Utterly welded, solid, robust extractor canopies. They are manufactured of high quality AISI-304 18/10 stainless steel with superficial satin finish.

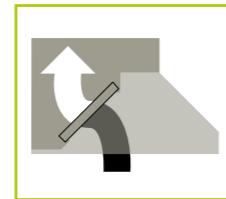

Perfect finishes
Utterly welded cover. Joints without rivets or seen screws. Flattened edges to facilitate its cleaning and avoid cutting injuries. Dividers-free equipment for a major extraction capacity.

Functional plenum
Wide interior plenum which can optionally be equipped with individual regulation sliding flaps for each filter or different high quality extraction turbines.

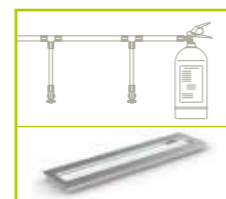

Practical details and options
Optional fire-extinction system can be integrated. Included stainless steel slats filter. Solid wall anchors of easy and quick installation. Stainless steel drainage plugs. Cutting-proof flattened edges. Optional extraction cover is available

High performance
Outstanding extraction capacity thanks to its streamlined profile geometry, big size of its hood and plenum. Optionally, flow regulators can be integrated

Tight body
The surrounding hood is airtight sealed, avoiding smoke escapes and grease leaks. The drainage system conducts grease by means of gravity to the drainage plugs for disposal.

Options
The industrial and inverted-filter extractor canopies can be optionally equipped with fire self-extinguishing system. Airtight illumination of high brightness and low consumption and many other accessories are available.

Jointing kit
Equipment longer than 3 metres are supplied in two pieces with an easy-to-assemble sturdy jointing kit leaving a uniform unit perfectly finished.

SNACK LOW WALL EXTRACTOR CANOPIES

- Manufactured of satin finish AISI-304 18/10 stainless steel.
- Welded extractor canopy with flattened edges for an easy and safe cleaning.
- Exterior roof and backrest manufactured of galvanized steel.
- Oil drainage with threaded plug.
- Solid wall anchor easy to install (it includes screws and accessories).
- Optionally, it can integrate turbine of 400°C/2h as well as fire self-extinguishing system, see page 126.
- For extractor canopies longer than 3 metres, consult our staff.
- It includes AISI 430 stainless steel slats filters, 490x490x50mm.

SNACK WALL EXTRACTOR CANOPIES SERIES 110

- Manufactured of satin finish AISI-304 18/10 stainless steel.
- Welded extractor canopy with flattened edges for an easy and safe cleaning.
- Exterior roof and backrest manufactured of galvanized steel.
- Oil drainage with threaded plug.
- Solid wall anchor easy to install (it includes screws and accessories).
- Models with adjustable integrate an interior plenum with individual adjustable sliding flaps.
- In models with turbines, the standard turbine must be installed, for other options see page 126-127.
- Optionally, it can integrate turbine of 400°C/2h, see page 126 as well as fire self-extinguishing system, see page 126.
- For extractor canopies longer than 3 metres, consult our staff.
- It includes AISI 430 stainless steel slats filters, 490x490x50mm.
- Optional lighting, see page 127.

WALL EXTRACTOR CANOPIES - INDUSTRIAL SERIES

- Manufactured of satin finish AISI-304 18/10 stainless steel.
- Maximum extraction capacity thanks to its streamlined profile geometry, big size of its hood and exterior plenum.
- Welded extractor canopy with flattened edges for an easy and safe cleaning.
- Exterior roof and backrest manufactured of galvanized steel.
- Oil drainage with threaded plug.
- Solid wall anchor easy to install (screws and accessories included).
- Models with regulation integrate an interior plenum with individual adjustable sliding flaps.
- Extractor canopies longer than 3 metres are supplied in two pieces with a sturdy easy to assemble unseen jointing kit.
- Optional lighting, see page 127.
- Optional fire self-extinguishing system, see page 126.
- It includes AISI 430 stainless steel slats filters, 490x490x50mm.

LIGHTING

SURFACE LIGHTING

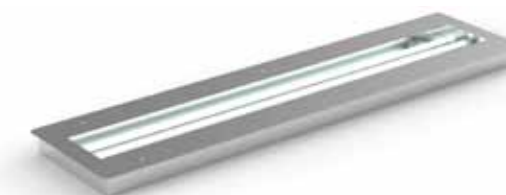

- Airtight surface lighting IP68 with polycarbonate body and silicone wiring.
- It includes fluorescent tubes.

EMBEDDED LIGHTING

NEW

- Embedded lighting with water-proof, dust-proof installation IP-68.
- Manufactured of stainless steel AISI-304 18/10.
- High resistance tempered glass integrated.
- Lighting by means of lamp strips Led T5 style.
- This lighting system is supplied ex-works assembled in the canopy.

STAINLESS STEEL SERVICE TROLLEYS

- Utterly manufactured of satin stainless steel AISI-304 18/10.
- Sturdy, reinforced structure, manufactured of 1.5mm thick tube.
- Very robust sound-proof shelves without cutting edges thanks to their special assembly and folding.
- 4 sound-proof swivelling wheels, Ø125mm (2 with brakes), equipped with metallic support and stain-proof rubber bumper.
- Capacity to hold 80kg/shelf, with a maximum of 250kg/trolley (for distributed loads).

HEATED TROLLEYS WITH HUMIDITY CONTROL

- Utterly manufactured of stainless steel AISI-304 18/10 with reinforced structure and components.
- Maximum energetic efficiency thanks to its integral fire-proof high density ecologic polyurethane insulation of great thickness.
- Door equipped with key locks, 270° opening and metal reinforced hinges.
- Ergonomic oversized handle, equipped with key lock.
- Embedded interior slides. Separation between slides: 70mm.
- Perimeter bumper.
- Removable tight silicone weather strip, manufactured in one piece with rounded corners.
- Sound-proof wheels, Ø125mm (2 with brakes).
- Large stainless steel back handles.
- Digital panel with separated humidity and temperature control.
- Single-phase 230v / 50Hz.

Maximum quality
Products manufactured of high quality AISI 304 18/10 stainless steel equipped with European manufactured superior components and designed for an intensive professional long-lasting use.

Integration
ERATOS Drop-in range enables the easy integration of buffet and self-service equipment to a functional level and the client's aesthetic, based on standard elements easy to fit in.

Easy to install
The Drop-in elements only need connection to electricity and/or pipes. Units can be installed onto the Drop-in equipment and control panel is mobile and detachable.

Finish and design
Top range finish and design details. Metal hardware, tempered glass, hanging doors, perfect adjustments. No welds, rivets, plastic or rails at sight.

Hygiene and ergonomics
All materials, used together with the ample sanitary edges applied to the surfaces, ensure extreme hygiene. All elements have been designed complying with ergonomics and enabling an easy use.

Efficiency and technology
ERATOS cooled and heated Drop-in units are highly efficient thanks to the engineering applied to its technical design and the use of coolant gasses and insulation of leading-edge technology.

Broad range and availability
Our extensive catalogue of Drop-in elements and units enables the choice of a proper element for each necessity. Our permanent stock ensures an immediate availability.

Options and accessories
We offer options, such as the "thermometer kit", which shows the temperature of the drop-in lower element. This range has numerous accessories that broaden its setting options.

COOLED BOARDS WITH REFRIGERATING UNIT

- Manufactured of satin stainless steel AISI-304 18/10.
- Embedded board, refrigerated by means of copper serpentine tubing.
- Coolant gas R-290. Optional gas R-134a for 2, 3 and 4GN or R452 for 5GN and 6GN.
- Board interval temperature -4°C/+4°C.
- High density and thickness ecologic injected insulation.
- Built-in drainage.
- 1-metre-long mobile control panel with digital thermometer/thermostat and illuminated switch. It contains a removable panel that can be placed on the exterior part of the module to facilitate the temperature view and the equipment control.
- Built-in condenser unit.
- Single-phase voltage 230v/50Hz

VENTILATED REFRIGERATED STRAIGHT SHOWCASES WITH INSULATED WELL

- Manufactured of satin stainless steel AISI-304 18/10.
- Refrigerated by means of ventilated evaporator gas R-290 y digital thermostatic control. Optional gas R452A.
- High density and thickness ecologic injected insulation.
- 3-level glass exhibit.
- Working interval temperature +4°C/+12°C.
- Entirely welded well with rounded sanitary edges and built-in drainage.
- Designed for wells GN of up to 150mm deep (not included).
- Double glazing sliding doors on the service side. Folding methacrylate doors on the clients side.
- Interior low- consumption lighting.
- Safety tempered glass.
- Mobile control panel with digital thermometer/ thermostat and illuminated switch.
- Built-in condenser unit.

VENTILATED REFRIGERATED SHOWCASES WITH INSULATED ON-MOTOR BASE

Model SVSM-160

Model SVSP-160

- Cooled showcase with insulated built-in base.
- They can be installed as an independent element on any straight surface.
- They are manufactured in two different types: open with roller shutter and closed with foldable doors.
- Manufactured of satin stainless steel AISI-304 18/10.
- Embedded interior base with rounded corners for a better hygiene and cleaning, built-in drainage.
- High density and thickness ecologic injected insulation.
- Refrigerated by means of ventilated evaporator gas R-290 and digital thermostatic control. Optional gas R452A,
- Working interval temperature +4°C/+12°C.
- Double glazing sliding doors on the service side and methacrylate folding doors on the clients´ side, except for the open model (SVSP-160) which includes a rolling shutter.
- Interior glass shelves, easily removable.
- Built-in condenser unit.
- Possibility of manufacture in 230V-1F/60Hz.
- Interior low- consumption lighting.

HUMID HEATED BAIN-MARIE WELL

- Manufactured of satin stainless steel AISI-304 18/10.
- Wells with rounded sanitary edges and drainage.
- Designed for GN wells of up to 150mm deep.
- Fire-resistant polyurethane insulation.
- Well heating by silicone resistances with security klixon.
- 1-metre-long mobile control panel with digital thermometer/thermostat and illuminated switch. It contains a remova-

- ble panel that can be placed on the exterior part of the equipment to facilitate the temperature view and the equipment control.
- Adjustable working temperature+50°C/+90°C.
- Water intake tap of 1/2" and drainage with overflow pipe and outlet of 3/4".

GN trays not included

DRY HEATED BAIN-MARIE WELLS

- Manufactured of satin stainless steel AISI-304 18/10.
- Designed for GN wells of up to 100mm deep (not Included).
- Shielded resistances heating protected by means of drilled double bottom with safety klixon.
- Folding resistances to facilitate its cleaning.
- 1-metre-long mobile control panel with digital thermometer/

- thermostat and illuminated switch. It contains a removable panel that can be placed on the exterior part of the module to facilitate the temperature view and the equipment control.
- Adjustable working temperature+50°C/+90°C.

GLASS-CERAMIC HOT PLATE

- Manufactured of satin stainless steel AISI-304 18/10.
- SCHOTT CERAN® glass-ceramic, 6mm thick.
- Well heating by silicone electric resistances with security klixon.
- Fire-resistant polyurethane insulation.
- Working temperature 50°C to 100°C regulated by means of electronic thermostat.
- Sealed perimeter by means of special black silicone.
- 1-metre-long mobile control panel with digital thermometer/thermostat and illuminated switch.

DROP-IN AND BUFFET UNITS BRACKETS KIT

The ample variety of brackets, units and glass panels enables our clients to find an adequate solution to each necessity and/or setting.

- **2 types of installation systems**
 - Directly on the equipment, on the stainless steel frame (Drop-in).
 - Exterior, directly on the counter top (Buffet).
- **3 different types of brackets**
 - On rounded tube Ø50mm.
 - On rectangular vertical tube 60x40 mm.
 - On tilted rectangular tube 60x40mm.
- **2 types of lighting and heat**
 - Models with LED lighting.
 - Models with lighting and heat.
- **3 types of tempered glass**
 - Double curve glass.
 - Straight glass.
 - Front glass.

DROP-IN MODELS /INTERIOR

The bracket is placed on the lateral frames of the Drop-in elements. It is easily installed due to the fact that the inferior part of all devices shows an indication of the place where to drill for a perfect joint.

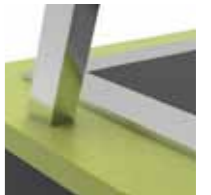

Example of rounded bracket, Drop-in and curved glass

Example of rectangular tilted bracket, Drop-in and straight glass

BUFFET MODELS /EXTERIOR

In this case the bracket is placed directly on the surface of the Buffet, easily installed by means of the included support.

Example of tilted rectangular Buffet bracket and straight glass

Example of rectangular vertical Buffet bracket and straight glass

BRACKETS AND LAMP STRIP UNITS

NEW DESIGN

- Each type of bracket contains the correspondent lamp strip or lamp strip with heat.
- Manufactured of satin stainless steel AISI-304 18/10 easy to install.
- Tempered glass, 6mm thick.
- Straight or curved safety tempered glass (Important: not included with lamp strips, separate order needed).
- 2 types of strips
 - Models with LED lighting.
 - Models with heat and light, they include heating by means of ceramic resistances and halogen lighting.
- Electric connection 230V/50-60Hz

Maximum quality
High quality Buffet module manufactured on a very robust structure constructed with materials of leading brands, carefully selected and handled.

Customization and decoration
The possibilities of functionally and aesthetically personalizing these products are vast. This enables the characteristics of buffet module to be easily adapted to the necessities of each client.

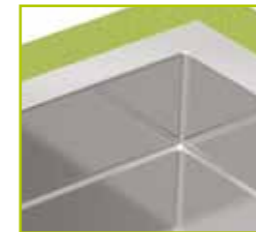

Modularity and functionality
Buffet modules can be supplied independently or in lineal module of big sizes, thanks to such options as the union kit. Configuration possibilities are enormous.

Easy installation
The modules are supplied fully assembled and they have solid wheels. The laterals and plinths are removable for an easy access to their interior.

Finish and design
The details and aesthetics have been thoroughly supervised. Countertops as well as decorative panels are manufactured in one piece without joints or unions.

Hygiene and ergonomics
The modular buffet has been designed considering its functional ergonomics from the point of view of the user thus it is user-friendly and enables easy maintenance and cleanness.

Broad range and availability
The variety of modules is wide and together with the drop-in elements it offers ample setting possibilities. It also has short-term manufacturing periods.

Show-cooking modules
The show-cooking series enlarges the possibilities of Eratos buffet settings. It can be equipped with hot plate and be accompanied by an induction show-cooking extractor hood.

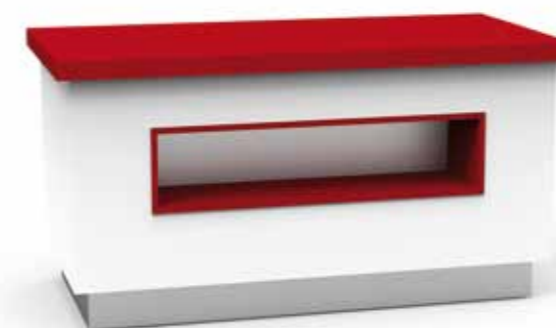

BUFFET MODULE FOR DROP-IN

- Available in 4 lengths, for maximum capacities of 3, 4, 5 and 6 GN1/1 and with two different depths 85 and 110cm.
- One piece synthetic quartz counter top without joints.
- Countertop with enlarged edges to 6cm.
- Waterproof lacquered decorative front panels or, optionally, manufactured of waterproof wood with melamine finish.
- Reinforced metallic structure.
- Height adjustable legs for a correct levelling.
- All models contain stainless steel AISI 304 18/10 perimeter plinth, easily removable.
- Equipped with wheels for easy mobility and installation.
- Easily removable laterals for an easy access to the interior of the buffet, with ventilation grille.
- Possibility of joining buffets by means of a joint kit, making it

possible to create lineal Buffet modules of any composition and length.

- Any drop-in element can be embedded (ventilated refrigerated Drop-in cannot be embedded in Buffet modules with plates shelves).
- Lamp strip and heat lamp strip available for each model, being also possible to embed Drop-in elements with their own installed lamp strips.
- Optional shelves for plates, manufactured of the same material as the countertop.
- LED lighting is added on the plates shelves.

SETTING OF BUFFET IN PICTURE

- Module MBP8-4G/0.
- Countertop decoration, option BDCE8-4GN RED.
- Front panels decoration WHITE RAL-9003 standard.

SETTING OF THIS BUFFET IN PICTURE:

- Module BDP11-5G/5.
- Countertop decoration, option BDCE11-5GN BLACK.
- Plates shelf decoration, option BCE11-5GN BLACK.
- Front panels decoration, option BDCD11-5GN OAK.
- Drop-in PCV5G.
- Buffet-style lamp strip BPLC-5GN.
- Buffet-style glass BCR-5GN.

INSTRUCTIONS FOR BUFFET SETTING

1. To select the **depth** of the buffett:
 - 85cm: Compact buffet for central or wall setting, go to page 168.
 - 110 cm: Central wide buffet, go to page 169.
2. To select the **length (maximum GN capacity)**, the optional shelves for plates and the distribution of shafts for the embedment of Drop-in elements:
 - 3G/N1/1: Length 1375mm, with maximum capacity for a Drop-in of well 3GN1/1.
 - 4G/N1/1: Length 1700mm, with maximum capacity for a Drop-in of well 4GN1/1.
 - 5G/N1/1: Length 2025mm, with maximum capacity for a Drop-in of well 5GN1/1.
 - 6G/N1/1: Length 2350mm, with maximum capacity for a Drop-in of well 6GN1/1.
 - Note 1: The ventilated cooled wells, showcases, ice cream wells and dry bain-marie cannot be embedded on modules with plates shelves.
 - Note 2: The Drop-in ice cream well requires a size of 2GN1/1.
3. To select the **decoration** of the buffet:
 - Countertop (and plates shelves) decoration: WHITE is standard finish included in the price. For other available options, go to page 172.
 - Front panels decoration: Select a standard front decoration (go to page 173) or request a customized decoration.
4. To select the **Drop-in elements** to embed in the shafts, go to pages 148-157.
5. To select the **lamp strips and glass panels** suitable for buffet 2, 3, 4, 5 or 6GN, go to pages 159.163.
 - There is a great variety of brackets, lamp strips and glass panels, with 2 possibilities of placement, one onto the SST frame of the Drop-in section (Model DROP-IN) and the other directly onto the countertop of the Buffet (Model BUFFET).
6. **Additional options**, go to page 172-173:
 - Backsplash options: it enables the wall setting of 86mm deep Buffets.
 - For the creation of a lineal Buffet by means of the joint of 2 or more modules, select "Option joint kit" (BKU) and set the module.

BUFFET MODULE FOR SHOW COOKING

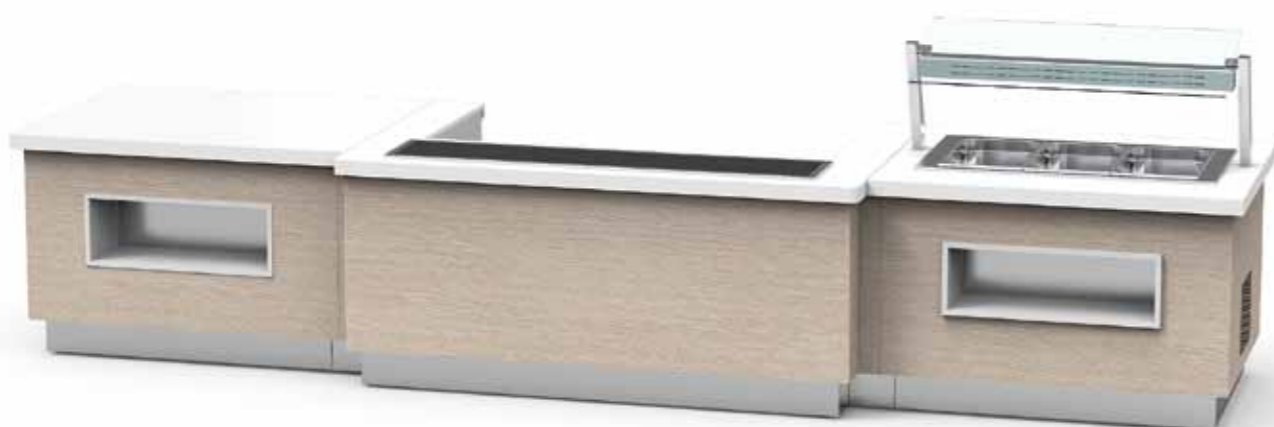

NEW

- Available in 2 lengths (2025 and 2350mm), and 2 depths (1100 and 1250mm).
- There are models with the possibility of adding tempered or vitro-ceramic glass for temperature maintenance on the front part of the countertop.
- Reinforced metal structure.
- Quartz synthetic countertop, manufactured in one piece and without joints.
- Countertop with enlarged edges to 6cm.
- Waterproof lacquered decorative front and lateral panels or, optionally, manufactured of waterproof wood with melamine finish, see page 173.
- Stainless steel AISI 304 18/10 front on the side of the cook.
- Height adjustable legs for a correct levelling.
- Equipped with wheels for easy mobility and installation.
- Easily removable laterals for an easy access to the interior of the buffet.
- All models contain stainless steel AISI 304 18/10 perimeter plinth, easily removable.
- Possibility of joining Buffets by means of the joint kit, making it possible to create lineal Buffet modules of any composition and length.
- The rear part of the sockets is free for the cooking equipment installation.

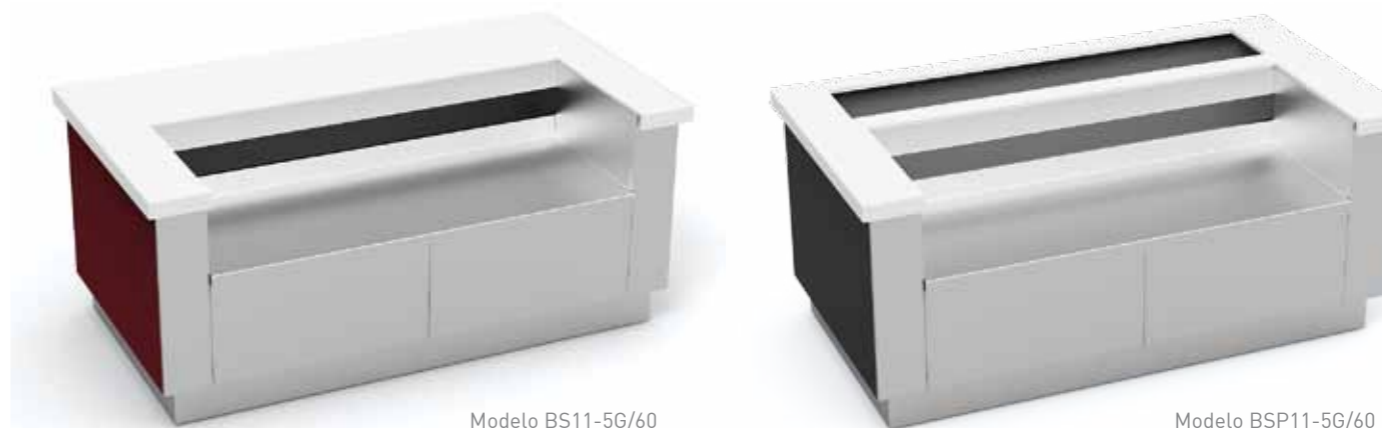

INSTRUCTIONS FOR SHOW COOKING SETTING

- 1. Selection of the depth of the show cooking equipment:**
 - 110cm: Compact show-cooking for 60 or 75cm deep cooking elements. It can be combined with Buffet models 85 or 110cm deep.
 - 125cm: Show-cooking for 75cm deep cooking elements. It can be combined with buffet models 85 or 110cm deep.
- 2. Selection of the length, the optional hot plate shaft and the size of recess for cooking elements.**
 - 5G/N1/1: Length 2025mm, with a recess for cooking elements of 1600mm long.
 - 6G/N1/1: Length 2350mm, with a recess for cooking elements of 1800mm long.
- 3. Selection of the decoration of the show-cooking:**
 - Countertop decoration: WHITE is standard finish included in the price. For other available options, go to page 172.
 - Front panels decoration: Select a standard front decoration (go to page 173) or request a customized decoration.
- 4. Additional options:**
 - If show-cooking with shaft for hot plate has been selected, the type of colour of this plate has to be selected as well.
 - For the creation of a lineal Buffet by means of the joint of 2 or more modules, select "Option joint kit" (BKU) and set the module, see page 173.

MODULES JOINTS KIT

- It enables the joint of 2 Buffets to make one set.
- Successive joints for the creation of lineal Buffet of any composition and length is easily achieved.

Model	RRP (€)
BKU	280

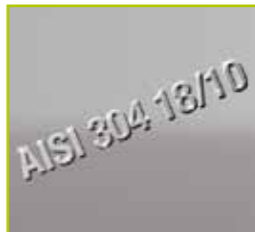

Under order, tray-sliders can be supplied in the buffets.

Maximum quality
Premium quality stainless steel AISI 304/10 products equipped with materials of European leading brands, designed for a professional and long-lasting use.

Easy installation
The constructive modular system composed by independent equipment sets simplifies the installation of Self-service. Its accessories have been designed to be quickly and easily installed.

Efficiency and technology
Eratos cooled Self-service modules are highly efficient thanks to the applied engineering, its technical design and the use of coolant gasses and insulation of leading-edge technology.

Hygiene and ergonomics
All materials used, together with the ample sanitary edges applied to the surfaces, ensure extreme hygiene. All elements have been designed complying with ergonomics and enabling an easy use.

Finish and design
The finish and design details are top range. Metal hardware, tempered glass, hanging doors, perfect adjustments. No welds, rivets, plastic or rails at sight.

Personalization
Eratos Self-service can be adapted and customized thanks to the removable panels in plain colour or wood, apart from having the possibility of adding adhesive vinyl sheets with any desired design.

Broad range
The ample variety of modules, combinations and available capacities enable the organization of Self-service lines which can exactly fit to the necessities of each project.

Children Self-service
Designed specifically for food and drink service for children. It has been created carefully taking into account the security of children as well as their use ergonomics. See page 198.

COOLED BOARDS

- Manufactured of satin 304 18/10 stainless steel.
- High density and thickness ecologic injected insulation.
- Built-in countertop, with 80mm fronts, and entirely welded.
- Refrigerated by means of copper serpentine tubing, condense gas unit R-290 and thermostat digital control.
- Board interval temperature $-4^{\circ}\text{C}/+4^{\circ}\text{C}$.
- Removable condenser unit in $\frac{3}{4}$ parts, which makes its maintenance and cleanness easy.
- Incorporated drainage.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Single-phase voltage 230v/50Hz
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Optional gas R-134a (3,4GN), R452A (5,6GN).

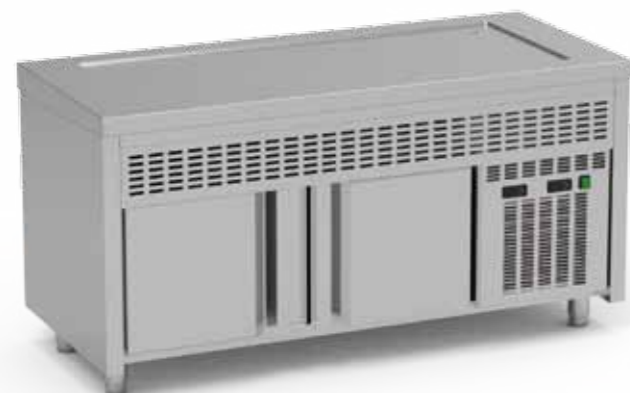

Detail of refrigerated board.

Heat unit, glass panel or tray slide not included in the price. See page 193-194

COOLED WELLS

- Manufactured of satin 304 18/10 stainless steel.
- Cooled well with rounded sanitary edges and capacity for GN wells maximum 200mm deep.
- Ecologic high density polyurethane insulation.
- Refrigerated by means of copper serpentine tubing, condense gas unit R-290 and thermostat digital control.
- Temperature interval in the well $0^{\circ}\text{C}/+5^{\circ}\text{C}$.
- Removable condenser unit, which makes its maintenance and cleanness easy.
- Built-in drainage.
- Countertop with front edges 80mm, entirely welded.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Single-phase voltage 230v/50Hz
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Optional gas R-134a (3,4GN), R452A (5,6GN).

COOLED SHOWCASE KIT WITH INSULATED BASE AND COUNTER

- Manufactured of satin 304 18/10 stainless steel.
- Cabinet upper front with front edges 80mm, entirely welded.
- Embedded lower base with rounded corners for a better hygiene and easy to clean with and high density ecologic insulation.
- Removable condenser unit, which makes its maintenance and cleanness easy.
- Refrigerated by means of ventilated evaporator, condenser unit with gas R-290 and thermostat digital control.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Built-in drainage.
- Double glazing sliding doors on the service side and methacrylate hinged doors on the clients' side.
- 3 removable glass shelves.
- Low consumption interior illumination.
- Single-phase voltage 230v/50Hz
- Working temperature interval +4°C/+12°C.
- Optional gas R452A.

- Optionally, the panels can be manufactured in any colour and with personalized decoration on vinyl film (inquire about prices)

NEW

Maximum quality
Premium quality stainless steel AISI 304/10 products equipped with materials of European leading brands, designed for a professional and long-lasting use.

Designed for children
Especially designed for the catering of food and drink to children of different ages, normally between 6 and 12 years old. Some design characteristics are present only in this range.

Security
Children Self-service includes special characteristics to offer a total security for children. Among them, it includes the bain-marie module 90°, which prevents risks of burns.

Hygiene and ergonomics
All materials used, together with the ample sanitary edges applied to the surfaces, ensure extreme hygiene. All elements have been designed complying with ergonomics and enabling an easy use.

Personalization and product range
The children range self-service offers a great variety of modules and accessories. The decorative panels can be customized in plain colour, wood effect or any desired design.

Easy installation
The constructive modular system composed by independent equipment sets simplifies the installation of the Self-service. Its accessories have been designed to be quickly and easily installed.

Efficiency and technology
Cooled and hot Self-service modules are highly efficient thanks to the engineering applied to its technical design and the use of coolant gasses and insulation of leading-edge technology.

Finish and design
The finish and design details are top range. Metal hardware, tempered glass, hanging doors, perfect adjustments. No welds, rivets, plastic or rails at sight.

CHILDREN OPEN SELF COOLED BOARD

- Manufactured of satin 304 18/10 stainless steel.
- Built-in countertop, with 80mm fronts, and entirely welded.
- Cooled board with high density ecologic insulation.
- Open lower part.
- Refrigerated by means of copper serpentine tubing, condense gas unit R-290 and thermostat digital control.
- Condenser unit removable by means of rails, which makes its maintenance and cleanness easy.
- Board interval temperature $-4^{\circ}\text{C}/+4^{\circ}\text{C}$.
- Incorporated drainage.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Single-phase voltage 230v/50Hz.
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196.
- Optional gas R-134a.

Detail of cooled board.

CHILDREN OPEN COOLED WELL

- Manufactured of satin 304 18/10 stainless steel.
- Built-in countertop, with 60mm fronts, and entirely welded.
- Cooled well with rounded sanitary edges and capacity for GN wells maximum 200mm deep.
- Refrigerated by means of copper serpentine tubing, condense gas unit R-290 and thermostat digital control.
- Condenser unit removable by means of rails, which makes its maintenance and cleanness easy.
- Board interval temperature $0^{\circ}\text{C}/-5^{\circ}\text{C}$.
- Incorporated drainage.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Single-phase voltage 230v/50Hz
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Optional gas R-134a.

Lamp strip or trays slides are not included in the price. See page 193-194

COOLED SHOWCASE KIT WITH INSULATED BASE AND CHILDREN SELF COUNTER

- Manufactured of satin 304 18/10 stainless steel.
- Cabinet countertop with front edges 80mm, entirely welded.
- Embedded lower base with rounded corners for a better hygiene and easy to clean which includes ecologic high density and thickness insulation.
- Double glazing sliding doors on the service side and methacrylate hinged doors on the clients' side.
- Refrigerated by means of ventilated evaporator, condenser unit with gas R-290 and thermostat digital control.
- Neutral inferior module.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Single-phase voltage 230v/50Hz
- Working temperature interval in the well+ $4^{\circ}\text{C}/+12^{\circ}\text{C}$.
- Built-in drainage.
- Removable glass shelves.
- Low consumption interior illumination.
- Optional gas R-134a.

CHILDREN SELF HUMID BEIN-MARIE

- Manufactured of satin 304 18/10 stainless steel.
- Heated well with rounded sanitary edges and capacity for wells GN maximum 200mm deep.
- Fireproof ecologic polyurethane insulation.
- Well heating by means of silicone resistances that improve the efficiency and reduce the electric consumption.
- Adjustable well temperature +30°C/+90°C.
- Inlet tap of and drainage of 1/2" with ball valve mechanism and overflow pipe.
- Countertop with front edges 80mm, entirely welded.
- Robust height adjustable legs by means of hidden screw, with optional decorative plinths, see page 195.
- Stainless steel front decorative panel. Optionally, it can be supplied in plain colours or wood-effect; see page 196
- Single-phase voltage 230v/50Hz.
